CENSUS OF POPULATION AND HOUSING

NATIONAL CENSUS AND STATISTICS OFFICE
MANILA, PHILIPPINES

REPUBLIC OF THE PHILIPPINES NATIONAL ECONOMIC AND DEVELOPMENT AUTHORITY

HIS EXCELLENCY
PRESIDENT FERDINAND E. MARCOS
Chairman

GERARDO P. SICAT Director General

NATIONAL CENSUS AND STATISTICS OFFICE

TITO A. MIJARES

Acting Executive Director & Civil Registrar-General

At the time this final provincial report went to press. Presidential Decree No. 418 was issued (March 20, 1974) reconstituting the Bureau
of Census and Statistics into a new office under the administrative supervision of the National Economic and Development Authority.

PREFACE

Presented in this report are statistics of the population in the province as a whole, in urban and rural areas, and in municipalities and barrios, based on the data collected during the Population and Housing Census conducted on May 6, 1970. This report provides information on the number of inhabitants and their age, sex, marital status and other demographic characteristics as well as data on literacy, school attendance, migration, fertility, labor force and other social and economic information about the population.

While basic demographic information was collected for every individual in the population, sampling was utilized in the collection of household information on literacy, migration, fertility, economic activity, etc. The specific items which were covered in the sampling scheme adopted for the census are enumerated in detail in the Explantory Text of this report.

This report is one of 67 in the series of the Final Provincial Reports on Population and Housing. The National Summary for the Philippines will follow after all the provincial reports in the present series shall have been published.

Other reports to be published are the Special Reports on: a) Population, such as data on employment status cross-classified with highest grade completed, school attendance, usual occupation or activity during the twelve months preceding May 6, 1970; the employed and unemployed by major industrial classification and major occupational classification; type of vocational or technical skill of the population 10 years of age and over; and mother tongue by literacy and highest grade completed of the population six years of age and over, and b) Housing—such as data on number of households and persons in households by type of building cross-classified by sex, age, and marital status of heads of households; by type of building cross-classified by usual occupation, activity and sex of heads of households; and by type of building cross-classified by type of activity, industry and sex of heads of households.

We are deeply thankful to His Excellency, the President of the Philippines, for activities the taking of the census and underscoring the need for the assistance and cooperation of all government agencies and instrumentalities in the census effort through the creation of the Presidential Census Coordinating Board composed of heads of certain Government Agencies, such as: the Office of the Executive Secretary, the Departments of Commerce and Industry, National Defense, Education, Public Works and Communication, Agriculture and Natural Resources, Health, the Presidential Assistance on Community Development (PACD), and the Presidential Economic Staff (PES), and the various bureaus and offices under them, and the Provincial and City, Municipal and Municipal District Census Boards which were chairmanned by the provincial governors, city, municipal and municipal district mayors, respectively.

Special mention is made of the assistance and cooperation of the Bureau of Public Schools which supplied the census supervisors and enumerators for the actual census taking and the Armed Forces of the Philippines which made available their communication and transportation facilities for the transmission of census messages and the transport of census forms to and from the province after the field enumeration.

Finally, we give our sincere thanks to the mass media and to the general public for their cooperation in this undertaking.

Manila, Philippines April, 1974

PREFACE

Presented in this report are statistics of the population in the province as a whole, in urban and rural areas, and in municipalities and barrios, based on the data collected during the Population and Housing Census conducted on May 6, 1970. This report provides information on the number of inhabitants and their age, sex, marital status and other demographic characteristics as well as data on literacy, school attendance, migration, fertility, labor force and other social and economic information about the population.

While basic demographic information was collected for every individual in the population, sampling was utilized in the collection of household information on literacy, migration, fertility, economic activity, etc. The specific items which were covered in the sampling scheme adopted for the census are enumerated in detail in the Explantory Text of this report.

This report is one of 67 in the series of the Final Provincial Reports on Population and Housing. The National Summary for the Philippines will follow after all the provincial reports in the present series shall have been published.

Other reports to be published are the Special Reports on: all Population, such as data on employment status cross-classified with highest grade completed, school attendance, usual occupation or activity during the twelve months preceding May 6, 1970; the employed and unemployed by major industrial classification and major occupational classification; type of vocational or technical skill of the population 10 years of age and over; and mother tongue by literacy and highest grade completed of the population six years of age and over, and b) Housing—such as data on number of households and persons in households by type of building cross-classified by sex, age, and marital status of heads of households; by type of building cross-classified by usual occupation, activity and sex of heads of households; and by type of building cross-classified by type of activity, industry and sex of heads of households.

We are deeply thankful to His Excellency, the President of the Philippines, for authorizing the taking of the census and underscoring the need for the assistance and cooperation of all government agencies and instrumentalities in the census effort through the creation of the Presidential Census Coordinating Board composed of heads of certain Government Agencies, such as: the Office of the Executive Secretary, the Departments of Commerce and Industry, National Defense, Education, Public Works and Communication, Agriculture and Natural Resources, Health, the Presidential Assistance on Community Development (PACD), and the Presidential Economic Staff (PES), and the various bureaus and offices under them, and the Provincial and City, Municipal and Municipal District Census Boards which were chairmanned by the provincial governors, city, municipal and municipal district mayors, respectively.

Special mention is made of the assistance and cooperation of the Bureau of Public Schools which supplied the census supervisors and enumerators for the actual census taking and the Armed Forces of the Philippines which made available their communication and transportation facilities for the transmission of census messages and the transport of census forms to and from the province after the field enumeration.

Finally, we give our sincere thanks to the mass media and to the general public for their cooperation in this undertaking.

Part i - POPULATION

INTRODUCTION

The 1970 Census of Population, taken on May 6, 1970, was the first to be conducted by the Bureau of the Census and Statistics after the establishment of its local offices in almost all the provinces of the country. These field offices, which are staffed by two to ten regular employes, directed, supervised and controlled the field enumeration.

The figures in this report are based on the data collected through the schedules used during the population census enumeration, namely:

- PH Census Form No. 2 (Ordinary Household) which was used in 19 out of every 20 households enumerated;
- PH Census Form No. 2-A (Sample Household) which was used in 1 out of every 20 households enumerated; and
- PH Census Form No. 5-B (Institutional Census Report) which was used for those living in an institution or collective living quarters, such as jail, training camp, convent, ship, dormitory, seminary, hospital, asylum, military camp, welfare institution, etc.

Most of the items in these schedules were pre-coded to relieve the enumerators of the tedious task of memorizing or of having to constantly refer to the Enumerator's Manual for the necessary codes, reduce processing costs and time, and make possible the release of advanced data within a relatively shorter period. The latest available electronic data processing machine was also utilized to process the census data and hasten the publication of the census reports.

The total population of the Philippines on Census Day, May 6, 1970, was 36,684,486. This figure includes the household population of 36,602,532 and the institutional population of 81,954.

AUTHORITY FOR THE 1970 CENSUS

Commonwealth Act 591 authorizes the Bureau of the Census and Statistics "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

Executive Order No. 149, issued by the President on October 1, 1969, originally set Sunday, February 16, 1970, as the Census Day or the date of the start of enumeration. This was later amended by Executive Order No. 211, dated February 14, 1970, resetting the Census Day to Wednesday, May 6, 1970.

ADVISORY COMMITTEE

To avail of the expert advice of organizations and individuals with technical competence and experience in specialized fields, an Advisory Committee was formed.

Represented in the Committee were the Population Institute; National Coordinating Center for the Study and Development of Filipino Children and Youth; University of the Philippines; Philippine Statistical Center; National Economic Council; Presidential Economic Staff; Department of Labor; Regional Urban Planning Office; People's Homesite and Housing Corporation; Department of Health; Department of National Defense; National Science Development Board; Commission on National Integration; Presidential Arm on Community Development; Bureau of Private Schools; Bureau of Public Schools; Budget Commission; Philippine Statistical Association; Institute of Planning and the Asian Development Bank.

PERSONNEL

A total of 79 regular bureau personnel were recruited from the various divisions to compose the Task Force that trained the Census Officers and served as resource persons during the operation. This Task Force was trained by the Chief Trainers who were ranking personnel of the bureau involved in the planning and preparatory phases of the census work.

Every province had a provincial census officer or officer-incharge who supervised the field operations, assisted by welltrained central office personnel. For the entire country, there were 2,297 public school principal teachers designated to act as supervisors, and 66,722 public school teachers who served as enumerators during the census enumeration. Coordinating the activities of all the field force was on Operations Unit with its staff from the Manila Office.

CENSUS BOARDS

The Presidential Census Coordinating Board (PCCB) which was created by Executive Order No. 211, was responsible for the systematic coordination of government agencies and instrumentalities involved in the census effort. The Census Director was named Executive Officer of the PCCB, with the Executive Secretary as Chairman and the Secretary of Commerce and Industry as Vice-chairman. Represented in the PCCB were the Departments of Commerce and Industry, National Defense, Education, Public Works and Communication, Agriculture and Natural Resources, Health, the Presidential Assistant on Community Development and the Presidential Economic Staff.

As counterpart of the PCCB at the local government level, there were also established Provincial, City and Municipal Census Boards which provided such assistance and facilities as were required during the field enumeration.

The Provincial Census Board was composed of the Provincial Governor as Chairman, and the Division Superintendent of Schools, Senior District Highways Engineer, PC Provincial Commander, Provincial Health Officer, Provincial PACD Official and the Provincial Agriculturist as members.

The City Census Board was composed of the City Mayor as Chairman, and the City Superintendent of Schools, City Engineer and the City Health Officer, as members.

The Municipal Census Board was composed of the Municipal Mayor as Chairman, and the Supervisor/Principal Teacher, Municipal Health Officer, Municipal Agriculturist and the Municipal PACD Officer, as members.

Each board had a secretariat headed by an executive officer who was the Census Officer and membership was comprised of personnel detailed from the different government agencies, instrumentalities, government-owned or controlled corporations as well as from the local governments.

ESTABLISHMENT OF ENUMERATION AREAS

For census purposes, the country was divided into 38,522 enumeration districts (ED's). An ED is a specified area, the enumeration of which can be finished by one enumerator within an allotted period of time; usually it has a population from 800 to 1200 persons. However, as a result of the decision to undertake the census enumeration in 10 days instead of 20, as originally planned, most of these ED's are split into two or more parts, each part assigned to one enumerator. The last digit of the ED code indicates whether an ED is split into parts for enumeration purposes.

METHOD OF ENUMERATION AND USE OF SAMPLING

The enumeration of the population is done by personal interview. Each enumerator visits the households within his ED of assignment and obtains the information called for in the population schedules. If the household is an ordinary household (non-sample), the respondent is interviewed using PH Form 2; if a sample household, the respondent is interviewed using PH Form 2A.

All households were asked items relating to the personal characteristics of every member of the household, such as relationship to head, sex, age, marital status, citizenship, mother tongue, school attendance and highest grade completed. However, for every 20th household (5 percent), additional items on literacy; ability to speak Pilipino, Spanish, or English; religion; place of residence in February 1960 and May 1965; items on the labor force, including employment, industry and occupation for persons 10 years old and over; and items on fertility for evermarried women were asked by the enumerators (see "Population Items of Data Collected").

PLACE WHERE ENUMERATED

The population were enumerated in their usual place of residence. Usual place of residence is the geographic place (barrio, municipality or province) where the enumerated person usually resides. This maybe the same as or different from the place where he was found at the time of the census. As a rule, it is the place where he usually sleeps.

POST-ENUMERATION SURVEY

A Post Enumeration Survey (PES) was conducted by the bureau from May 25 to June 5, 1970, to measure coverage and content errors in the main enumeration.

The PES was conducted independently from the main enumeration by 503 specially selected and trained teacher-enumerators under the supervision of 31 Task Force personnel from the Manila Office, who were trained by the members of the Sampling Committee which designed and planned the PES operation in coordination with key officials of the Population and Demography Divisions and the Operations Unit.

A simple two-stage sampling design was utilized. Enumeration districts and households constituted the primary and secondary sampling units, respectively. A total of 503 ED's were taken as samples and these were allocated to the 67 provinces in proportion to their 1970 projected population. However, all Mindanao provinces, except Camiguin, were allotted at least 8 ED's each, while the Visayas and Luzon provinces at least 4 ED's each.

Two general forms were used, PH-PES Form 6 (listing form) and PH-PES Form 7 (sample household schedule). In each of the selected sample ED's, an independent and complete listing of all households was made and this served as the frame for the selection of a 10 percent sample of the households. The selection of households was done by systematic sampling with a random start

CONTENT AND COVERAGE

This provincial report is presented in four (4) parts and comprises fifty-nine (59) tables, as follows:

No of Tables

	No. of	100162
Number of inhabitants	•	6
Economic characteristics	:	20
Social characteristics		19
Marital status	3	
Education and literacy	. 7	
Citizenship	. 2	
Mother tongue		
Ability to speak Pilipino, English		
and Spanish	. 2	
Religion	^	
Demographic characteristics		14
Fertility		
Migration		
		-

Tables based on a 5 percent sample may contain figures in the distribution of a certain characteristic which do not correspond to the figures in the distribution of the same characteristic in the tables on a 100 percent basis. However, the totals in the tables based on a 5 percent sample and on 100 percent are the same

The coverage of the population enumerated in the census and the size of the sample are shown below:

Topic	+ Table + No.	Coverage	Size of sample (percent)

DEFINITION OF TERMS AND CONCEPTS

The following terms and concepts were used in the conduct of the census enumeration—

URBAN AND RURAL AREAS

The following concepts were followed in classifying areas as urban in the 1970 Population Census:

- In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
- Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
- III. Poblaciones or central districts (not included in I and II), regardless of the population size, which have the following:
 - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
 - At least six establishments (commercial, manufacturing, recreational and/or personal services); and
 - c. At least three of the following:
 - (1) A town hall, church or chapel with religious services at least once a month;
 - (2) A public plaza, park or cemetery;
 - (3) A market place or building where trading activities are carried on at least once a week, and
 - (4) A public building like a school, hospital, puericulture and health center or library.
- IV. Barrios having at least 1,000 inhabitants which meet the conditions set forth in III above, and where the occupation of the inhabitants is predominantly non-farming/ fishing.

In the 1960 census the following areas were considered urban:

- I. In their entirety, all municipal jurisdictions which, whether designated as chartered cities, provincial capitals or not, have a population density of at least 1,000 persons per square kilometer. The whole of Quezon, Baguio and Cebu cities, notwithstanding the minimum density rule, are to be included.
- II. For all other cities and municipalities with a population density of at least 500 persons per square kilometer, only the poblacion (regardless of population size) is to be considered; any barrio having at least 2,500 inhabitants and any barrio contiguous to the poblacion with at least 1,000 inhabitants. For cities where the poblacion is not specified, the central district or the "city proper" (e.g., for Davao-Bucana (1) Davao Proper (2) and Molave (3) shall be regarded as the poblacion.
- III. For other cities and municipalities with a population of at least 20,000 persons, only the poblacion (regardless of population size) and all barrios having at least 2,500 inhabitants and contiguous to the population.
- IV. All other poblaciones having a population of at least 2,500 persons.

USUAL PLACE OF RESIDENCE

The usual place of residence is the geographic place (street, sitio, barrio, municipality or province) where the enumerated person usually resides. This may be the same as or different from his legal residence, or the place where he was at the time of the census. As a rule, it is the place where he lives and sleeps most of the time.

HOUSEHOLD

Usually a household consists of a group of people who sleep in the same dwelling unit and have common arrangement for the preparation and consumption of food. However, a person living alone in a distinct dwelling unit is considered as one separate household. In most cases, a household consists of a related family group. In some instances, three generations may be found living together in one household. Same household members may have no relationship to the central group—boarders and servants, for example—but they are counted as part of the household if they eat and sleep or at least sleep in the same dwelling unit.

A "lodger" (who rents a room or space) is grouped with the household from whom he rents his room or space unless he has separate cooking facilities and a different entrance.

In most cases, a household may be taken to be the entire group of persons who customarily sleep in one dwelling unit. An exception, however, is that of two or more distinct family groups with independent eating arrangements who share one dwelling unit only for economy or for lack of housing facilities in the district.

PERSONS NOT LIVING IN HOUSEHOLD

These include persons in military installations, correctional and penal institutions, dormitories of schools and universities, hospitals, religious institutions and the like.

HEAD OF HOUSEHOLD

The head of household is the person who generally provides the chief source of income for the household unit. He is the adult person, male or female, who is responsible for the organization and care of the household or who is regarded as such by the members of the household.

RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head. Examples of this relationship are: wife, son, daughter, son-in-law, daughter-in-law, grandchild, other relatives (niece, nephew, aunt, uncle, etc.), not related members (boarder, servant, etc.).

USUAL MEMBERS OF THE HOUSEHOLD

These are members of the household who regard the dwelling unit presently enumerated as his home or the place where he usually sleeps.

SPECIAL AREAS

This is a classification of the living arrangements for a group of ten or more persons unrelated to the head of the household or the person in charge.

PERSONS COUNTED AND ENUMERATED

These include the following:

- a. Those present and alive at the time of the enumeration except those born after 12:01 a.m. of May 6, 1970;
- b. Those temporarily absent at the time of the enumeration for various reasons which include those:
 - 1. on vacation;
 - 2. on business;
 - 3. schooling below college level;
 - confined in a hospital, if confinement is not more than six months;
 - in the Armed Forces, if their absence is not more than six months:
 - in jail (provincial or municipal), if their sentence does not exceed six months.
- Those who are temporary residents or who are not certain they will be enumerated in their usual residence;
- d. Employes and domestics who live with the household, or at least sleep in the same unit;
- Filipino employes and domestics employed by a foreign family, who will not be enumerated in their usual place of residence;
- f. Boarders or lodgers who regularly sleep in the same dwelling unit;
- g. Citizens of foreign countries who are students, or who are employed, or who have a business in the Philippines and who are not living within the compound of any embassy, ministry, or legation and who expect to reside in the Philippines for a year or more. These include members of their families if they are in this country with them and who are also expected to reside in the Philippines for more than a year; and
- h. All those who are alive on May 6, 1970 (12:01 A.M.) but who subsequently died prior to the date of enumeration.

FAMILY NUCLEUS

A family nucleus is restricted to a married couple or parents and their never-married children in the same household, that is, to the conjugal family nucleus. A conjugal family nucleus consists of any of the following:

- a. a married couple without children;
- b. a married couple with one or more never-married children;
- c. one parent (either father or mother) with one or more never-married children.

AGE

This is the age of the person on his last birthday as of Census Day, May 6, 1970 in completed years. When the age of a person is not reported in the form, it is estimated on the basis of other available information such as marital status, school attendance, employment status and age of other members of the family.

CITIZENSHIP

A person's citizenship depends on the country to which he owes legal allegiance. If the father is a foreigner and the mother is a Filipino, infants or minor children follow the citizenship of their father.

MARITAL STATUS

This refers to the following:

- a. Single denotes a person who has never been married.
- b. Married denotes a person legally married, either living together with spouse at the time of the census or temporarily separated owing to work, illness, or service in the Armed Forces or a person who lives with someone as man and wife, whether legally married or not.
- c. Widowed denotes a married person whose spouse died and up to the census taking has not remarried.
- d. Separated denotes a person permanently separated from the spouse, legally or otherwise, because of marital discord or some other reasons. "Separated" in this sense, does not mean separated because of husband's military service duty, hospitalization, etc., which would separate the couple from each other temporarily.
- e. Divorced denotes a person who is granted such status through a court decree.

AGE AT FIRST MARRIAGE

This refers to the age when a woman first entered married life or her first consensual union (even if she were married more than once). Marriage here may either be a legal or consensual union (where the man and woman decide to live together without benefit of clergy or civil ceremony). Age refers to the particular age when a woman first had her marriage consummated. In a consensual union the date of first marriage refers to the date when the couple started living together.

MOTHER TONGUE

This refers to the dialect spoken in a person's home in earliest childhood. Aside from Pilipino, which is the national language, among the principal dialects spoken are: Cebuano, Tagalog, Hiligaynon (llongo-Visayan), llocano, Bicol, Samar-Leyte, Pampango and Pangasinan.

ABLE TO READ AND WRITE

A person is able to read and write when he can read and write a simple mesage in some language or dialect.

SCHOOL ATTENDANCE

This means attendance in schools or colleges, public or private, including night schools, which can advance a student in the regular curriculum recognized by the school system. This excludes attendance in vocational schools such as schools for dressmaking, beauty culture, hair science, watch repairing, or motorvehicle driving. It also excludes attendance in nursery schools. In general, training received by mail from correspondence schools is excluded. If, however, correspondence courses were given by a regular school, such as a university, and they are counted toward promotion in the regular school system, such schooling is included.

HIGHEST GRADE COMPLETED

This refers to the highest grade or year completed in any school, college or university.

HIGHEST DEGREE OBTAINED IN COLLEGE

This is the highest degree received after having completed a course of study at the college level of education. Information on the degree received includes the title of the highest degree, diploma or certification received, or an indication of the field of study, if the title does not make this clear.

RELIGION

A person, infant or adult, who is not yet baptized carries the religious affiliation of his brothers and sisters or, if an only child, that of his mother.

CHILDREN BORN ALIVE

These children are all live-born whether legitimate or illegitimate, or whether born of the present or prior marriage, and regardless of whether they are living or dead at the time of the census, or living elsewhere.

CHILDREN NOW LIVING

These children born to the woman concerned (whether legitimate or illegitimate, or whether born of the present or of prior marriages) are still living at the census date, regardless of their age or where they reside.

EVER-MARRIED WOMAN

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union.

VOCATIONAL OR TECHNICAL SKILL

The vocational or technical skill possessed by individuals is gained either through schooling, training, or experience. These persons are engaged in craft or manual operation which requires the exercise of considerable initiative, independent judgment and trade knowledge under varying work conditions. In addition, they show proficiency or technical ability in any art, science, or handicraft demonstrated by ease or expertness in performance or application.

REFERENCE WEEK

The data on the economic activities of persons 10 years old and over relate to the calendar week preceding the enumerator's visit, thus the reference week is not the same for all respondents because not all persons were enumerated during the same week. The majority of the population was enumerated during the 10-day period from May 6 to May 16, 1970.

ECONOMICALLY ACTIVE

The economically active household population includes all persons classified as employed or unemployed.

EMPLOYED

Employed persons comprise all population of households 10 years old and over who, during the preceding week of enumeration, were either (a) working for pay or for profit or without pay in the family farm or enterprise; (b) not working but had a job or business from which they were absent.

UNEMPLOYED

Persons in the household 10 years old and over are classified as unemployed if they were not at work during the reference week but were wanting and looking for work or would have been looking for work except that

- (a) they were temporarily ill, or
- (b) they believed no work was available.

NOT ECONOMICALLY ACTIVE

Persons living in households considered not economically active are those 10 years old and over who are not classified as employed or unemployed. Persons not economically active are further classified in this report into the following categories: (1) housekeeper, (2) student, (3) others.

HOUSEKEEPER

A housekeeper is a person who does housekeeping chares in one's house such as cooking, cleaning the house, and laundering for family members of the household. This does not include work around the house as painting one's house, fencing the home lot, cutting the lawn, etc. Persons doing this type of work are reported under "Others".

STUDENT

A student is a person enrolled in a school or college and is not considered economically active during the week prior to his enumeration. A working student is classified as "economically active" rather than "student" even though he spends more time in school than in his work.

OTHERS

"Others" may include persons doing any of the following activities:

- a. Retired or do not want to work
- b. Unable to work (because of physical disability or ill-health)
- c. Persons working without pay but not on family farm or enterprise, volunteer workers or persons doing such work as painting the house, fencing the yard, etc., in their own homes.

CLASS OF WORKER

- (1) The allocation of a person to a particular class of worker category is basically independent of the occupation or industry in which he works.
- (2) The class of worker information refers to the same job described in the occupation and industry column. The classification by class of worker consists of the following categories:
 - 1. Wage and salary worker
 - (a) Private employe—working for a private employer for wage, salary, commission, tips, etc.
 - (b) Government employe—working for government or government owned or controlled corporations.
 - 2. Own business
 - (a) Self-employed—working in one's business, farm, profession or trade for profit or fee, without paid employes.
 - (b) Employer—working in one's business, farm, profession or trade for profit or fee, with one or more paid employes.
 - (c) Unpaid family worker—working without pay on family farm or enterprise.

EXPERIENCED WORKER

A person who has worked or has been employed for two consecutive weeks, with or without a formal training, is an experienced worker.

OCCUPATION

Occupation refers to the kind of work done during the reference week by the person employed or the last work done by the unemployed but experienced worker, irrespective of the class of worker or industry in which the person is classified. Persons looking for work for the first time do not have any occupation and are therefore classified under a separate category.

USUAL OCCUPATION

This refers to the specific job or occupation performed by the person in the establishment, office, farm, etc., as farmer, typist,

stenographer, lawyer, physician, etc. This is the work a person has undertaken for the last twelve months before the census taking. Occupation here includes such usual activities as house-keeping in one's own house or studying and such status as disabled and retired.

INDUSTRY

Industry refers to the activity of the establishment in which an economically active person works during the reference week, or in the case of an unemployed but previously employed, to the activity of the establishment where he worked last. Therefore, persons looking for work for the first time do not have any industry and are separately classified.

Part II - HOUSING

Ite

INTRODUCTION

The Census of Housing was taken simultaneously with the Census of Population on May 6, 1970. The housing census is the principal means of collecting basic housing statistics aimed at providing comprehensive source of statistical information for development planning, for the formulation of housing policies and programmes, as frame for sample housing surveys and supplementary inquiries and for private researchers and commercial users.

The Census of Housing is also intended to get characteristics of structures in which people live, i.e., all "dwelling units" in the country. All structures, including those under construction (ready for occupancy on May 6, 1970) and other places of residence, were given a building serial number. The housing items (H1 to H15) were filled in only for all buildings/dwelling units in which people resided on May 6, 1970, regardless of whether they were residential or non-residential.

HOUSING ITEMS

The housing items are the same for both PH Census Form No. 2 (Ordinary household) and PH Census Form No. 2-A (Sample household).

The items asked are the following:

		_ ,
em No.	A.	Characteristics of building:
1		Type of building or house
2		Number of dwelling units in building or house: occupied-unoccupied
3		Construction material of roof
4		Construction material of wall
5		Year building was built
	В.	Characteristics of dwelling unit:
6		Number of rooms
7		Number of households and persons occupying
		dwelling unit
8		Type of tenure
	C.	Household conveniences
9		Ownership of radio
10		Ownership of television set
11		Ownership of refrigerator
12		Type of cooking fuel
13		Type of lighting
14		Source of drinking water
15		Type of toilet facilities

In accomplishing the housing schedule, Items 1 to 5 were asked of the first household to be enumerated in the building. Items 6 to 8 were asked of the respondent in any household in the dwelling unit, and Items 9 to 15 were asked of each household respondent in the dwelling unit.

DEFINITION OF TERMS AND CONCEPTS

BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls which extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another, having a common entrance and a common exit.

DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation, or one not intended for habitation but occupied as living quarters by a household at the time of the census. In most places in the country a dwelling unit is a house. It may be an apartment, a group of rooms or just one room, a barong-barong, boat or cave.

The types of buildings are:

- Single house a complete structure intended for a single family or household.
- Duplex a structure intended for two households, with complete living facilities for each. It is a single structure divided into two dwelling units by a wall extending from the floor to the ceiling.
- Apartment or accessoria a structure usually of several stories, made up of independent living quarters, with independent entrance from internal halls or courts. An accessoria is one or two-floor structure divided into several dwelling units, each dwelling unit having its own separate entrance from outside.
- Barong-barong a shack or makeshift shelter, usually built with light materials,
- Commercial a building used for trade and commerce such as a store or an office building.
- Industrial a building used for processing or manufacturing, such as a factory plant.
- Agricultural any structure used for agriculture purposes, such as barn, warehouse, etc.
- 8. Institutional a hospital, school, church, etc.
- Others any structure which does not fall into any of the above classification.

NUMBER OF DWELLING UNITS IN THE BUILDING

This includes all dwelling units that are "occupied" and those that are "unoccupied". In cases of residential compounds or private residences having one or more auxiliary buildings (in addition to the principal building) and which are used as living quarters by some members of the household, said auxiliary buildings are treated as annexes of the principal building, and as such all the buildings in the compound are considered as one dwelling unit.

CONSTRUCTION MATERIAL OF ROOF

The kinds of materials used in the construction of the root are:

- 1. Galvanized iron, including aluminum and fiberglass
- 2. Asbestos
- 3. Concrete, tile
- 4. Cogon
- 5. Nipa, anahaw, buri
- 6. Others (canvas, salvaged materials, billboards)

CONSTRUCTION OF WALL

The kinds of materials used in the construction of the wall are:

- Concrete, including hollow blocks, adobe stone, bricks, etc.
- 2. Galvanized iron, including aluminum
- 3. Wood, including plywood
- 4. Bamboo, including sawali
- 5. Nipa, anahaw, buri
- Others (Salvaged materials like cartons, billboards, canvas, etc.)

If the roof and walls are constructed of two or more materials, the predominant material is reported.

YEAR BUILDING WAS BUILT

This refers to the period when the extent of construction permitted occupancy for living purposes and not when begun. The year reported is the particular year when occupancy started or when the building was ready for occupancy even if not occupied.

NUMBER OF ROOMS IN THE DWELLING UNIT

This pertains to the total number of rooms in a dwelling unit. This includes the bedroom, dining room, living room, kitchen and other separate spaces used or intended for dwelling purposes. Passageways, verandas, lobbies, bathrooms and toilets are not counted as rooms.

NUMBER OF OCCUPANTS

This pertains to the total number of occupants or persons whose usual place of residence is with this dwelling unit.

The dwelling unit may contain more than one household, in which case the number of occupants includes all the members of the different households whose usual place of residence is this dwelling unit.

TYPE OF TENURE

The type of tenure may be any of the following:

- Owner occuppied only. A dwelling unit is "owner occupied only" if the owner is one of the persons living in the unit even if he is temporarily absent.
- Owned and part rented out. A dwelling unit a part of which is occupied by the owner and a part rented by another, i.e., if there is a lodger.
- Owned and part occupied free by others. A dwelling unit may be owned by one of those living in the unit even if he is temporarily absent. In addition, a part of that dwelling unit may be occupied free by another household, family, relative, lodger, etc.
- Rented only. A unit is "rented" if rent is paid or contracted for by the occupants, in cash or in kind.
- 5. Rented and part occupied free by others. "Rented and part occupied free by others" is when one household rents a dwelling unit and then allows another household to occupy a portion of the same unit without paying any rental.
- 6. Rented and a part rented out. The term applies to the occupancy of dwelling unit that is being rented by one household, but a portion of which is being subleased, or rented out by said household to another household, lodger, etc.
- Occupied rent-free. A dwelling unit which is occupied by a household other than the owner's and for which no rent either in cash or in kind is paid.
- 8. Occupied rent-free and part rented out. This type of occupancy has the same concept as in the preceding item except that a part of the dwelling unit is being rented out to another household or party for a certain amount.

OWNERSHIP OF RADIO

This includes all sets, whether console, table or portable and whether individual unit or combined with television, phonograph, clock, etc. which are in working condition or are being repaired. Excluded are automobile radios, sending-receiving sets ("ham radio" sets), and radios which are not in working order.

OWNERSHIP OF TELEVISION SETS

Only television sets in working condition are included.

OWNERSHIP OF REFRIGERATOR

Only refrigerators that are in working order and run by electricity or any kind of fuel are included. Refrigerators which are in working order but cannot be utilized because of lack of power in the locality are excluded.

KIND OF COOKING FUEL

The kinds of cooking fuel are:

- 1. Electricity from whatever source of power unit
- 2. Kerosene (gaas) liquid form
- Gas (liquefied petroleum) piped or in cylinder (Esso Gasul, Rockgas, Shellane, Manila Gas, etc.)
- 4. Wood, including sawdust
- 5. Charcoal
- 6. Others any kind of fuel other than those mentioned above.

TYPE OF LIGHTING

The types of lighting are:

- 1. Electricity from whatever source of power unit
- 2. Kerosene (gaas) whatever the nature of lamp used
- 3. Oil any kind of vegetable (or animal) oil other than kerosene
- 4. Others any kind of fuel other than electricity, kerosene or oil, i.e., candle wax

TYPE OF WATER SUPPLY

The source of drinking water of the household may be any of the following:

- 1. Piped water system (Municipal, NAWASA)
- 2. Artesian well
- 3. Pump
- 4. Open well
- 5. Spring
- 6. Rain water
- 7. Lake, river, stream, etc.

TYPE OF TOILET FACILITIES

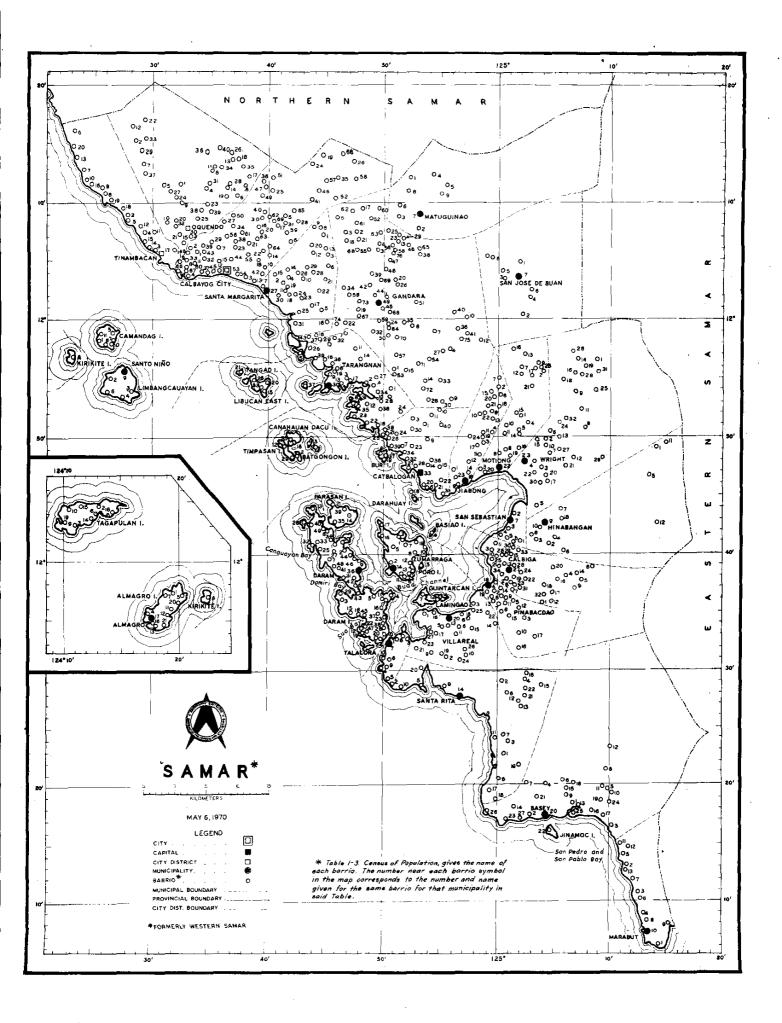

The different types of toilet facilities commonly used in buildings and houses throughout the country are the following:

 Flush system/water-sealed — Water-sealed toilet is that type where after water is flushed or poured into the bowl a small amount is left in the bowl which seals in bottom from the pipe leading to the depository. In effect, the flush toilet is one type of water-sealed toilet.

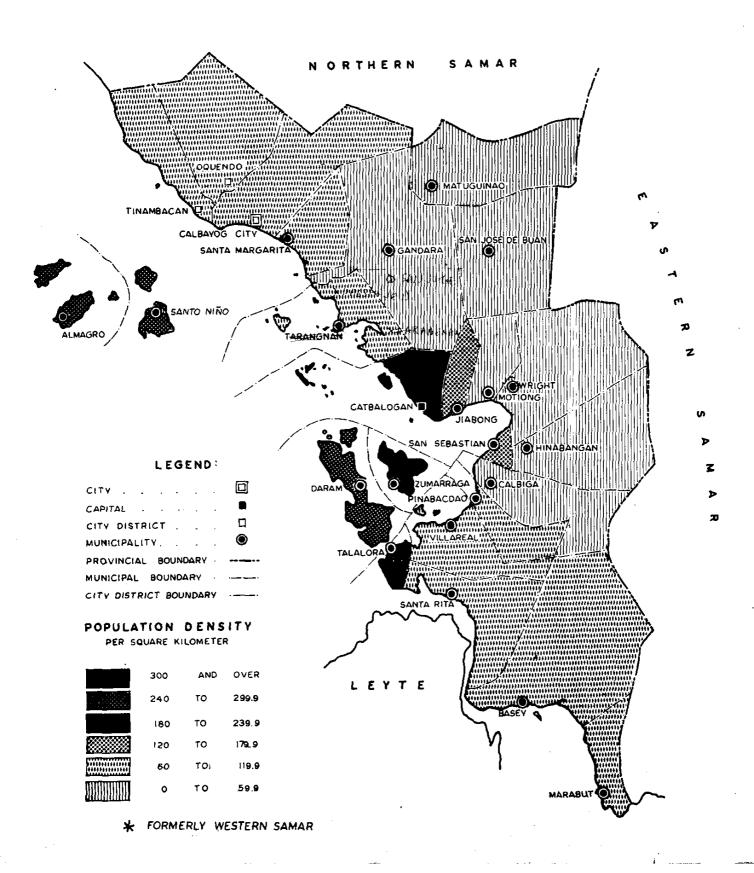

Another type of water-sealed toilet is the cement bowl with a structure quite similar to an enamel bowl. It is connected to a septic tank or concrete depository or sometimes drum or closed pit.

The other kind of cement bowl is constructed much lower than the above-mentioned type to conform to certain Filipino toilet habits.

- Antipolo system or closed pit is a type of toilet wherein water is not used. It is a closed pit or a drum with a small opening on floor level or with a box-like structure which is elevated from the floor.
- Open pit system is a pit which is entirely open or partly covered.
- 4. Public toilet is any type of toilet for communal use.

POPULATION DENSITY MAP OF THE PROVINCE OF SAMAR* BY MUNICIPALITY: 1970

SAMAR (WESTERN SAMAR)

INTRODUCTION

Considered the third largest island in the Philippine Archipelago, Samar Island lies southeast of Luzon. It occupies the northernmost section of the Eastern Visayas Region. Prior to the approval of Republic Act No. 4221 on June 19, 1965, Samar Province comprised the whole island of Samar, Under this act, the western portion of Samar was created a separate province named Western Samar. A subsequent legislation (Republic Act No. 5650), however, changed the name of the province to Samar on June 21, 1969.

The new province is bounded by Eastern Samar and Northern Samar on the east and north, respectively, Leyte Gulf on the south, and the Samar Sea on the west. The San Juanico Strait separates it from the province of Leyte on the southwest.

Samar has a rugged interior, on account of which most of its 22 municipalities and 1 city are situated near the coast. Basey, Gandara, and Sta. Rita are leading rice-producing areas, while Catbalogan, the capital, is an important seaport located along Maqueda Bay.

LAND AREA AND POPULATION

The land area of Samar is 5,591.0 square kilometers, constituting 1.9 percent of the total land area of the Philippines. The province has a population of 442,244 almost all of which (99.9%) are native born (Table I-6). Its population count places Samar in the 30th position in population rank throughout the whole country. In 1960 its density was 66.0, rising to 79.1 in 1970, or an increase of 13.1 persons per square kilometer within a decade. Despite the increase, however, its density is lower than the entire country's density (122.3) by 43.2. The population of the province increased by only 19.9 percent from 1960 to 1970, in comparison to 35.4 percent for the Philippines. During the same period the country grew annually at the rate of 3.01 percent whereas Samar grew at the rate of 1.79 percent, ranking 52nd among the 67 provinces in the rate of population growth between 1960 to 1970.

URBAN-RURAL RESIDENCE

The province is still predominantly rural, with only 12.6 percent of the population urbanized as compared to 31.8 percent for the whole Philippines. The sex structure of the urban population is slightly predominated by the females, although in the rural areas the females are outnumbered by the males. The males comprise 49.1 percent of the urban population and 51.0 percent of the rural population, while the respective figures for the females are 50.9 percent and 49.0 percent (Table I-4).

HOUSEHOLDS AND CONJUGAL FAMILY NUCLEI

Samar has an aggregate of 76,797 households and 81,904 conjugal family nuclei. Each household is composed, on the average, of 5.8 persons and each conjugal family nucleus, of 5.4 persons (Table 1-3).

AGE COMPOSITION

Comparatively, the province has a younger population than the Philippines, and a lower proportion of persons in the productive or working ages. While the country has 43.1 percent of its population in the age group 0-14 and 53.4 percent in the age group 15-64, Samar has 47.9 percent and 49.0 percent in the respective age brackets. However, there is only a slight difference in the

proportion of the population 65 years and over between the country (3.5%) and the province (3.1%).

The proportion of the youth population in the urban areas is very much lower than in the rural areas. Correspondingly, a higher percentage of the productive ages (15-64) and the older age group are found in the former than in the latter areas. Of the urban population 44.6 percent are 0-14 years of age; 51.5 percent, 15-64; and 3.9 percent, 65 and over. On the other hand, 48.3 percent of the rural population belong to the younger age bracket, 48.7 percent to the working ages, and 3.0 percent, to the older age group (Table I-4).

On account of its young population, Samar has a very high dependency ratio. There are more dependents in the province than productive persons. For every 100 persons in the working ages, 104 are considered "dependents". The dependency ratio in the urban areas (94) is somewhat lower than that in the rural areas (105), which is still rather high, compared to 87 for the whole Philippines.

ECONOMICALLY ACTIVE POPULATION

More people are economically active than not in Samar. Out of 294,332 persons aged 10 and over, 56.2 percent are economically active, while 43.7 percent are not economically active. A great majority (94.5%) of those falling under the former category are employed, with only 5.5 percent unemployed. Of the unemployed 56.1 percent are seeking work for the first time. Househ

Housekeepers comprise 51.5 percent of those belonging to the latter category; students, 10.9 percent; and "others", 37.6 percent (Table II-1).

CLASS OF WORKER

A total of 160,129 experienced workers are reported for the province, 21.3 percent of which are wage and salary workers, 47.6 percent are in their own business, and 30.9 percent are unpaid family workers (Table II-3). Over three-fourths (75.7%) of the wage and salary workers are private employees and less than one fourth, or 24.3 percent, government employee.

INDUSTRY

Samar has remained highly agricultural. Agriculture, hunting, forestry and fishing are chiefly engaged in by 72.3 percent of the total experienced workers in the province (Table II-6). Only one-tenth (10.2%) are in services, followed by 8.4 percent in manufacturing; 3.8 percent in commerce; 1.9 percent in construction; and 1.8 percent in transport and communication. A small number are in mining and quarrying (0.5%), electricity, gas water and are in mining and quarrying (0.5%), electricity, gas, water and sanitary services (0.2%), and in industries not adequately described (0.9%).

Of those engaged in agriculture, hunting, forestry and fishing 76.8 percent are males and 23.2 percent are females. Eighty percent of the total economically active male population are in these industries, while half (49.5%) of the total economically active female population are working in the same industrial sector (Table II-1).

OCCUPATION

The experienced workers in Samar are mostly (72.0%)

farmers, fishermen, hunters, and loggers by occupation. One-tenth (10.2%) are craftmen, production process workers and laborers; 5.1 percent are service workers; 3.9 percent, professional, technical and related workers; 3.8 percent, sales workers; 1.6 percent, workers in transport and communication; and 1.5 percent, stevedores and related freight handlers. Put together, administrative and clerical workers, miners, members of the Armed Forces, and workers whose occupations are not specified or identifiable comprise merely 1.9 percent (Table II-12).

NUMBER OF HOURS WORKED

During the reference period, 47.0 percent of the 147,130 employed workers worked for 45 hours and over; 32.1 percent worked for 35 to 44 hours; 10.6 percent, for 25 to 34 hours; and 8.4 percent, for 15 to 24 hours. A small number (1.8%) put is less than 15 hours' work (Table II-15).

USUAL OCCUPATION

By usual occupation for the last twelve months, farmers, fishermen, hunters, and loggers comprised 71.5 percent; craftsmen, production process workers and laborers, 9.8 percent; service workers, 5.3 percent; professional, technical and related workers, 4.4 percent; and sales workers, 3.5 percent. A few were workers in transport and communication (1.7%), stevedores and related freight handlers (1.6%), and clerical workers (0.8%), while the rest were distributed over the other usual occupation groups (Table II-19).

MARITAL STATUS

A higher percentage of the population 10 years and over are married than single in Samar. Out of 291,897 persons belonging to this age bracket, 43.2 percent are never married, 52.2 percent are married, 3.8 percent are widowed, and only 0.7 percent, divorced or separated (Table III-1). More people are married than unmarried not only among the males but also among the females. Among the males 46.2 percent are unmarried and 50.8 percent are married, while among the females, 40.1 percent are single and 53.7 percent are married. There are more females (5.3%) than males (2.3%) in the widowed category.

LITERACY AND EDUCATION

Almost two-thirds (66.1%) of the population 6 years old and over are literate while 33.9 percent are illiterate. The urban areas, with 84.1 percent, have a higher literacy rate than the entire country with 83.4 percent. However, the level of literacy in the rural areas is only 63.4 percent (Table III-4). Of the population aged 25 and over 59.9 percent have completed elementary education, 8.6 percent have finished high school, and 4.8 percent, college. About 26.5 percent are reported not having completed any grade at all (Table III-6). Less than one-fourth, or 23.4 percent, of the population 6 years and over are attending school, with a large percentage (76.6%) not attending school. In the 6-24 year age group, however, 41.1 percent are attending school. The females comprise 52.1 percent of those attending school in the latter age group and the males, 47.9 percent (Table III-9).

HOLDERS OF COLLEGE DEGREE

Of the 6,382 degree holders in the province, 4,589, or 71.9 percent are in the teaching profession. Only 456, or 7.1 percent are in the Social Sciences, followed by 4.1 percent in Engineering; 4.0 percent in the Medical Sciences; 3.2 percent in the Humanities; and 1.2 percent in Agriculture. Very few are in Fine Arts (0.4%)

while 5.4 percent are in unspecified fields of study while

and in the Natural Sciences (0.1%), while 5.4 percent are in unspecified fields of study (Table III-10).

DIALECT

Samar-Leyte, the principal dialect in the province, is spoken by 402,561 persons, or 91.0 percent of the population. Approximately 7.8 percent speak Cebuano and merely 0.6 percent, Tagalog (Table III-13).

One-third (33.8%) of the populace are able to speak English and 30.9 percent, Filipino, while only 1.8 percent are able to speak Spanish (Table III-16).

RELIGION

The populace are predominantly Roman Catholics, numbering 422,542, or 95.5 percent of the population. Aglipayans comprise 2.7 percent; Protestants, 1.1 percent; "Others", 0.5 percent; and Iglesia ni Cristo, 0.2 percent (Table III-19).

FERTILITY

On the average, 5.7 children are born alive to an ever-married woman who has reached the end of the child-bearing period (50 years over and). While ever-married women in the rural areas have an average of 5.8 children, their urban counterparts have 5.3. Out of 23,714 ever-married women 50 years and over, 6.0 percent have never borne children by the end of their reproductive period. Proportionately, more women are childless in the urban (8.4%) than in the rural areas (5.6%). An average of 4.8 children are born to ever-married women who have already borne at least one child. The average number is nearly the same for the urban and the rural areas, with 4.9 and 4.8, respectively (Table IV-1).

Early marriages are observed among the women in Samar. Of the 93,205 ever-married women, over two-thirds, or 67.1 percent, were married by the age of 20 and 91.3 percent, by the age of 25 (Table IV-7).

MIGRATION

A large percentage (86.6%) of the population reside in the same municipality where they were born; only 7.6 percent live in a municipality other than the municipality of birth, but in the same province, while 5.7 percent were born in other provinces (Table IV-9).

More than nine-tenths, or 91.3 percent, of the population 10 years and over are residents of the same municipality where they were residing in 1960. A small percentage (4.4%) were then living in other municipalities within Samar, and 4.1 percent, in other provinces (Table IV-11).

NUMBER OF DWELLING UNITS

The province has 76,722 dwelling units, 98.7 percent of which are occupied and 1.3 percent are unoccupied (Table 1). Most of the dwelling units (93.4%) are single houses; 3.8 percent are "barong-barong" and 2.2 percent, duplex structures. Only 225, or 0.3 percent, are apartments/accesorias and 226, or another 0.3 percent, are commercial buildings.

More dwelling units are found in the rural (88.7%) than in the urban areas (11.3%).

TYPE OF CONSTRUCTION MATERIAL OF ROOF AND WALL

Of the total number of dwelling units 12,197, or 15.9

percent, are built with roof of strong materials (aluminum, galvanized iron, asbestos, tile or concrete) and 63,823, or 83.2 percent, of light materials (nipa or cogon).

In the urban areas, 3,116, or 35.9 percent, of the 8,670 dwelling units are built with roof of strong materials and 5,541, or 67.0 percent, of light materials. Of the 68,052 rural dwelling units 9,081, or 13.3 percent, are built with roof of strong materials and 58,282, or 85.7 percent, of light materials (Table 2).

Light materials are likewise more frequently used than strong ones in the construction of the wall; only 35.4 percent of the total number of dwelling units are constructed with walls of strong materials and 63.1 percent, of light materials. In the rural areas 32.5 percent are constructed with walls of strong materials and 65.9 percent, of light materials. Most of the urban dwelling units, however, have walls of strong materials (57.9%), while those with light ones constitute 41.8 percent (Table 2).

TYPE OF TENURE

A great majority of the 75,721 occupied dwelling units (95.5%) are owner-occupied only, owned and a part rented out, and owned and a part occupied free by others. Rented dwelling units comprise merely 2.2 percent and the occupied rent-free, 2.3 percent (Table 3).

In both the urban and the rural areas, most of the dwelling units are owner-occupied, although the proportion is very much higher in the latter, with 97.0 percent, than in the former, with 83.5 percent. Correspondingly, there are more rented dwelling units in the urban (11.9%) than in the rural areas (1.0%). Those occupied rent-free comprise 4.5 percent and 2.0 percent, respectively.

YEAR OF CONSTRUCTION

Three-fifths (61.0%) of the structures where dwelling units are found were built during 1965-1970; 29.0 percent, during 1955-1964; and 7.8 percent, during 1945-1954. Only 0.6 percent were built during 1942-1944 and 1.6 percent, before World War II (Table 4).

NUMBER OF HOUSEHOLDS IN EACH DWELLING UNIT

Almost all (97.3%) of the dwelling units in Samar are each occupied by one household (Table 5). Only 2.4 percent are occupied by two households; 0.2 percent, by three households; and 0.1 percent, by four households.

A large percentage of the dwelling units in both the urban (94.5%) and the rural (97.7%) areas are each occupied by one household. Few (4.6%) of the urban dwelling units are occupied by two households; 0.5 percent, by three households; 0.2 percent by four households; and 0.2 percent, by five households. Of the rural dwelling units, 2.1 percent are occupied by two households and 0.2 percent, by three households.

NUMBER OF ROOMS

More than two-fifths (42.3%) of the dwelling units have only one room; 29.0 percent, 2 rooms; 18.0 percent, 3 rooms; 6.9 percent, 4 rooms; and 2.3 percent, 5 rooms. Barely one percent (0.9%) have 6 rooms, while a few have 7 (0.3%) and 8 or more (0.3%) (Table 7).

OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR

Of the 76,797 households, only 26.2 percent are with radios;

0.1 percent are with television sets; and 0.6 percent, with refrigerators (Table 9).

Among the urban households 47.9 percent own radios; 0.1 percent, television sets; and 3.3 percent, refrigerators. Of the rural households, 23.4 percent are with radios. A negligible percentage own television sets (0.1%) and refrigerators (0.2%).

LIGHTING FACILITIES

Kerosene, used by 93.0 percent of the households, is the most common type of lighting found in the province. Electricity is used by 4.0 percent; oil, by 2.4 percent; and "others", by 0.6 percent (Table 11).

More rural (95.6%) than urban households (72.7%) use kerosene. However, electricity is used by 24.9 percent of the urban households, compared to only 1.3 percent of the rural households. On the other hand, 2.5 percent of the rural households use oil, while their urban counterparts make up only 1.5 percent.

WATER SUPPLY

One-third, or 35.6 percent of the total number of house-holds in the province use the open well; 23.8 percent, piped water; 18.8 percent, spring; 11.2 percent, artesian well; 4.1 percent, pump; 4.2 percent, lake, river, stream, etc.; and 2.3 percent rain water (Table 13).

More than two-fifths (43.8%) of the urban households use piped water; 26.7 percent, the open well; 13.1 percent, rain water; and 7.2 percent, the artesian well. A few use the pump (4.3%), spring (3.5%), and lake, river or stream (1.4%). The open well is common among the rural households, with 36.8 percent using it, followed by piped water (21.2%), spring (20.7%), and the artesian well (11.7%). A number use lake, river or stream (4.5%), the pump (4.2%), and rain water (0.9%).

COOKING FUEL

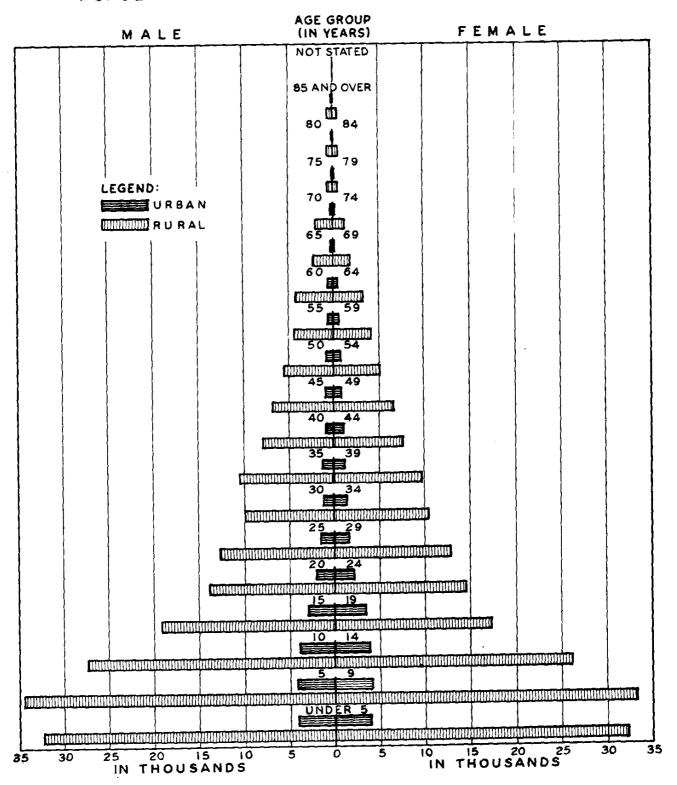

Majority of the households in the province (94.1%) use wood for cooking. Approximael wood for cooking. Approximately 3.7 percent use kerosene; 1.3 percent, gas (liquefied petroleum); and 0.1 percent, electricity

(Table 14). Wood is more frequently used among the rural (95.5%) than the urban households (79.4%). One-tenth (10.2%) of the urban households use kerosene and 7.4 percent, gas (liquefied petroleum), while only 2.8 percent and 0.5 percent of the rural households use these respective types. An insignificant percentage use electricity, with merely 0.5 percent in the urban and 0.1 percent in the rural areas.

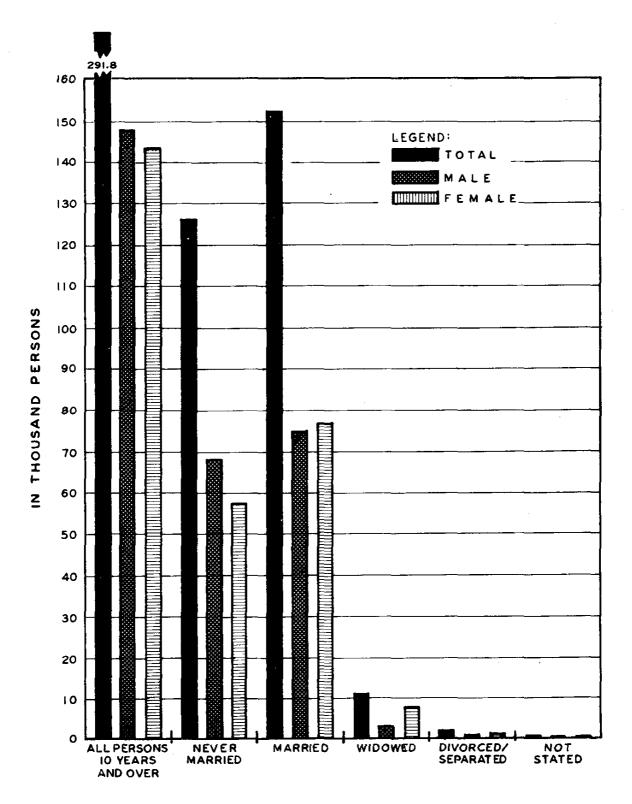

TOILET FACILITIES

By type of toilet facilities, 13.7 percent of the total households in the province use the open pit; 6.1 percent, the public toilets; 5.8 percent, the flush or water-sealed; and 2.3 percent, the antipolo or closed pit. Households having no toilet facilities constitute 72.1 percent (Table 15). Comparatively, a higher proportion of households in the urban areas use the flush or water-sealed type (27.9%) and the antipolo or closed pit (5.3%). The open pit, with 11.5 percent, is used by 14.0 percent in the rural areas. The corresponding figures for the preceding types are 2.9 percent and 1.9 percent. Households using the public toilets comprise 16.4 percent urban and 4.8 percent rural. Three-fourths (76.4%) of the rural households are without toilet facilities, compared to 38.9 percent in the urban areas.
